T-4896	48"	96"	730	2,766.00	3,368.00
T-5496	48"	96"	815	2,916.00	3,545.00

JIFFY TOWERS are manufactured for single or multiple height access. Stairways can enter or exit the tower from any side. The tower width dimension must be 12" wider than the tread width to allow ample hand clearance on the stair handrail. JIFFY STAIR handrails on standard models are made with a minimum 12" extension of the handrails at the top and the bottom into the landing area.

HEIGHT ADJUSTMENT -

Add or subtract \$28.00 for each 6 inches of variation, or fraction thereof, to the 96 inch standard height.

Example: to order a T-4848 JIFFY TOWER 123" tall, add \$28.00 five times or \$140.00 to the standard list price. \$1,584.00 plus \$140.00 equals \$1,724.00 list price.

WEIGHT ADJUSTMENT -

Add or subtract 8 pounds for each 6 inches of variation to the 96 inch JIFFY TOWER.

3" x 3" x 1/4" ANGLE LEG ADJUSTMENT -

Multiply leg length (deck height +3-1/2 feet) times \$33.50 and add to tower list price (includes all four legs)
Adds 7.32# per foot of leg length

JIFFY RAIL PRICE LIST
